A leak in the B concentrate pipeline was observed by the crews re-sleeving the pipeline. The leak occurred between 9 p.m. on 6/1/03 and 1 a.m. on 6/2/03. The release is estimated to be 40 tons and was contained on Kennecott property. The spill contaminates are 340 pounds arsenic, 20,000 pounds copper, and 1,200 pounds lead. The spill material and the surrounding soil will be re-processed through the facility. The spill location is south of the two previous spills and within eye site of the last spill site. The B-line flows south to north and the re-sleeving is being completed from north to south. The total distance of the below ground pipeline is approximately 12 miles. Coordinate information is available for each spill location.
